Fire Fighting Instructions:

This material will burn although it is not easily ignited. For fires involving this material, do not enter any enclosed or confined fire space without proper protective equipment, including self-contained breathing apparatus.

If possible, water should be applied as a spray from a fogging nozzle since this is a surface burning material. The application of high velocity water will spread the burning surface layer.

Combustion Products:

May include carbon dioxide, water vapor, carbon monoxide, original monomer, other hydrocarbons and hydrocarbon oxidation products, depending on temperature and air availability.

Melting Point: 170 – 230F

Chemical Stability: Stable

UV Protection – 7 Years Outside
